

# Static Roller & Utility Trailer

## R2000 Standard Features

- Mechanically actuated band-type brake
- Automotive-style front steering controlled by a heavy duty roller chain
- Hydrostatic transmission offers infinitely variable speed control in both forward and reverse
- Stainless steel water tank
- Premium cocoa mats on front and rear drums
- Special compression roll design enables work within 1 3/4" of obstructions
- Split front drum

For versatility, reliability and economy in a 1-ton static roller, you can't make a better choice than the Stow R2000. Convenient service and maintenance features include: easy access engine, hinged cover for hydrostatic transmission and jackshaft chain assembly, simple belt tensioning, easily accessible steering and drive lube points.
