Trenchers that really dig their work!

Tackle tough trenching jobs with Bobcat trencher attachments designed and built specifically for Bobcat loaders. That means reliable, cost-effective production as well as Bobcat warranty, parts and service support.

With 2- and 3-foot dig depths, the LT112, LT113 and LT213 are ideal for light-to-medium trenching jobs. The LT313, with its 3- or 4-foot dig depth, can easily handle medium-to-high production trenching. The LT112, LT113, LT213 and LT313 models feature manual side-shift—with an optional hydraulic side-shift available on the LT213 and LT313. The LT414 and LT405, with 4- or 5-foot dig depths, are high-production trenchers for use on Bobcat loaders with high-flow capability.

NOTE - Where applicable, dimensions are in accordance with Society of Automotive Engineers (SAE) and ISO standards. Specifications and design are subject to change without notice. Pictures of Bobcat units may show other than standard equipment. All dimensions are given for loader equipped with standard tires. All dimensions are shown in inches. Respective metric dimensions are enclosed by parentheses. Bobcat Company complies with the requirements of ISO 9001 as registered with BSI.

The Bobcat Attachments Advantage: Bobcat attachments are engineered and manufactured to fit Bobcat loaders for optimum job performance, dependability and durability.
